

Responsive Portfolio Website

Project Overview

This project is a responsive portfolio website developed using HTML, CSS, and JavaScript. The website is designed using a mobile-first approach and adapts seamlessly across mobile, tablet, and desktop devices.

Objectives

- Create a responsive webpage that works on different screen sizes.
- Implement CSS Grid and Flexbox layouts.
- Use media queries for responsiveness.
- Design a responsive navigation menu.
- Ensure proper spacing, alignment, and accessibility.

Technologies Used

- HTML5
- CSS3
- JavaScript

Features

- Responsive Navigation Menu
- Mobile-First Design
- CSS Grid Layout
- Flexbox Layout
- Responsive Hero Section
- Skills Section
- Projects Section
- Contact Section
- Footer
- Smooth Scrolling

Responsive Breakpoints

Mobile

Default layout for screens below 768px.

Tablet

Applied at min-width: 768px.

Desktop

Applied at min-width: 1024px.

How to Run

1. Download or clone the repository.
2. Open the project folder.
3. Open index.html in a web browser.
4. Alternatively, use the Live Server extension in VS Code.

Learning Outcomes

Through this project, I learned:

- Mobile-first web development
- Responsive design principles
- CSS Grid and Flexbox
- Media Queries
- Responsive navigation implementation
- Basic JavaScript DOM manipulation
