

PROJECT DOCUMENTATION

Project Title

Responsive Portfolio Website

Student Details

Name: Unnati Sharma

Program: B.Tech CSE

Organization: DecodeLabs Industrial Training Program

Introduction

This project focuses on designing and developing a responsive portfolio website using HTML, CSS, and JavaScript. The website follows modern frontend development practices including semantic HTML structure, mobile-first design principles, CSS Grid, Flexbox layouts, and responsive navigation.

The project demonstrates how a single webpage can adapt seamlessly across different screen sizes such as mobile phones, tablets, and desktop devices while maintaining usability and visual consistency.

Objectives

- Develop a responsive webpage using HTML5, CSS3, and JavaScript.
- Implement semantic HTML elements.
- Create a mobile-first responsive design.
- Apply CSS Grid and Flexbox concepts.
- Build a responsive navigation menu.
- Ensure proper spacing, alignment, and accessibility.

Requirements Implemented

Semantic HTML

The webpage uses semantic tags such as:

- Header
- Navigation
- Main
- Section
- Footer

Layout Design

The webpage consists of:

1. Navigation Bar
2. Hero Section
3. About Section
4. Skills Section
5. Projects Section
6. Contact Section
7. Footer Section

Styling

An external CSS file has been used for styling.

Key styling techniques include:

- CSS Grid
 - Flexbox
 - Responsive Design
 - Media Queries
 - Fluid Units (% , rem, vw)
 - Consistent spacing and typography
-

Methodology

Navigation Bar

The navigation bar contains:

- Website Logo
- Navigation Links
- Hamburger Menu for Mobile Devices

Flexbox is used to align elements horizontally.

JavaScript is used to toggle the navigation menu on smaller screens.

Hero Section

The hero section contains:

- Introduction Heading
- Professional Subtitle
- Call-to-Action Button

The content is centered and designed using responsive spacing.

About Section

The About section provides a brief introduction about the portfolio owner and highlights academic and technical interests.

Skills Section

The Skills section uses CSS Grid to display multiple skill cards.

Each card represents a technical skill such as:

- HTML
- CSS
- JavaScript
- Python
- Machine Learning
- Cybersecurity

Projects Section

The Projects section displays project cards using CSS Grid.

Each project card contains:

- Project Title
- Project Description

Contact Section

The Contact section contains:

- Email Information
- LinkedIn Link
- GitHub Link

Footer

The footer contains:

- Copyright Information
- Center-aligned content

Responsive Design

Media queries are implemented to ensure compatibility across:

- Desktop Devices
- Tablets
- Mobile Phones

Breakpoints Used

- Mobile: Default Layout
- Tablet: 768px and above
- Desktop: 1024px and above

Responsive Features

- Hamburger Navigation Menu
- Flexible Grid Layout
- Flexible Typography
- Adaptive Content Width
- Touch-Friendly Buttons

The layout automatically adjusts based on screen size to provide an optimal user experience.

Challenges Faced

- Implementing a responsive navigation menu.
 - Managing layouts across multiple screen sizes.
 - Ensuring consistent spacing and alignment.
 - Maintaining mobile-first design principles.
-

Learning Outcomes

Through this project, the following concepts were learned:

- Semantic HTML5
- CSS Grid
- Flexbox
- Media Queries
- Mobile-First Design
- Responsive Navigation
- JavaScript DOM Manipulation

- Frontend UI Development
-

Conclusion

The Responsive Portfolio Website project successfully demonstrates the use of HTML, CSS, and JavaScript to create a modern, responsive, and user-friendly webpage. The implementation of CSS Grid, Flexbox, Media Queries, and JavaScript-based navigation ensures that the website performs efficiently across various devices and screen sizes.

This project strengthened practical knowledge of responsive web development and modern frontend design techniques.
